

ACCEPTABLE USE POLICY

This book is intended to be sold for promotional purposes only. Please read the following statement if you wish to use this book to formulate an opinion or obtain legitimate information.

By purchasing this book you agree to abide by the following provisions:

- 1.** You acknowledge the author's role in the formulation and promulgation of both open and covert US foreign policy that caused the death, incarceration, repression, impoverishment and general suffering of millions. The author is considered a war criminal by governments around the world, including US-aligned countries that were not victims of his vision and influence.
- 2.** You condemn the author's responsibility for engineering the the final stages of the US's genocidal campaign against the people of Vietnam and Cambodia. It has been argued that the author's directives were responsible for as many deaths in Southeast Asia as the mass exterminations launched by Pol Pot.
- 3.** You condemn the author's complicity in the success of many repressive and genocidal regimes, through both explicit and tacit diplomatic approval and both direct and covert material support, including:
 - a.** Records show that the author verbally assured Indonesian dictator Suharto that he had full US support for brutally repressing the East Timor independence movement in 1975. The US continued to sell weapons illegally to the authoritarian regime until 1999.
 - b.** The author also supported the Pakistani army's atrocities in East Pakistan (Bangladesh). In 1971, the American Consul General to East Pakistan alerted both the author and President Nixon to the genocide being committed by Pakistan under the command of dictator Yahya Khan. The author, then Secretary of State, recalled the Consul, continued to pursue an alliance with Yahya and covertly supplied Pakistan with American weapons.
- 4.** You denounce the author for being the architect of Operation Condor, a transcontinental program of torture, surveillance and political repression. Organized in the United States in order to suppress political dissent and institute pro-US, authoritarian regimes of terror across Latin America, Operation Condor was the mechanism for the incarceration, deaths and disappearances of thousands.
- 5.** You hold the publisher of this book accountable for the author's status as a sincere intellectual and political authority in the eye of the mainstream media and general public. The publisher of this book and the media promoting it are responsible for the author's celebrity status despite multiple international indictments concerning his participation in the crimes detailed above.

If you choose to waive this agreement by failing to follow the terms outlined above, you grant your tacit approval of the actions committed by the author of this book both prior to and following the date of publication. Choosing to condone war crimes, authoritarianism, torture, political repression and genocide also entitles you to waive this agreement.
